

Dear Partner,

It is with great enthusiasm that we announce that Spencer Moulton is since December 14, 2018 subsidiary of Sacatec.

SACATEC, formulator and manufacturer of rubber, world leader in bladders for hydraulic accumulators, designs and manufactures molded technical parts for all industrial sectors since its creation in 1960, in particular oil, military, public works and railways. This manufacturing, comprising of mixing, adhesion, molding and assembly, is 100% carried out in France at its two plants in Ydes (Auvergne) and Claye-Souilly (Ile-de-France). Sacatec has been committed to a strict quality approach for more than 30 years, validated by ISO 9001 and EN 9100 certifications.

With Spencer Moulton in Malesherbes (Centre), the third plant, Sacatec is strengthening its position in the railway industry and is giving Spencer Moulton a new source of growth to boost its development and production capabilities.

Sacatec and its subsidiaries now represent € 25 million in sales and 180 employees.

All the production teams and the manufacturing site of Spencer Moulton in Malesherbes will remain unchanged. Sacatec and Spencer Moulton are complementary in the search for excellence, customer dedication, or technical knowledge.

Enthusiastic about these new opportunities, and looking forward to being able to tell you more in the near future, for instance at Sifer 2019 in Lille.

With our best regards.

Alexandre Wallyn  
President of Spencer Moulton  
Chairman of the Management Board of Sacatec
